SUMMARY

Highly motivated Cybersecurity Engineer and SOC L1 Analyst currently employed at Exposys Data Labs. Experienced in automated security infrastructure, real-time alert triage, and incident classification. Skilled in leveraging Python 3, cloud environments (Azure/AWS), and advanced logic to resolve complex software security challenges and streamline triage response workflows.

PROFESSIONAL EXPERIENCE

Cybersecurity Engineer / SOC L1 Analyst

Exposys Data Labs

Present

1. Gaining real-world industrial exposure managing automated security infrastructure frameworks, handling real-time incident responses, and supporting data-driven security workflows.

EDUCATION

1. Bachelor of Technology in Computer Science and Engineering (AI)

St. John's College of Engineering & Technology, Kurnool, AP
CGPA: 7.51

2022-2026

PROJECTS

•Email Shield: Total Automated Real-Time SOC Dashboard Challenge

Python & Cloud Security Automation Project (Major)

Feb 2026-Present

1. Developed a real-time SOC dashboard engine to aggregate and parse inbound communication meta-logs.
2. Engineered a high-performance relational database architecture to store scan metrics, privileges, and threat flags.
3. Technologies Used: Python 3, PostgreSQL, Supabase, Windows PowerShell, VirtualBox.

•AI SOC Copilot

SIEM Log Automation Project (Minor)

Jan 2025-Present

1. Designed an AI triage assistant that parses live Splunk data to automate L1 tasks and lower response bottlenecks.
2. Integrated streaming security event data with LLMs to generate context-aware remediation playbooks.
3. Technologies Used: Python 3, Splunk SIEM, Generative AI, LLM Integration.

•Image Encryption & Decryption Tool

Applied Cryptography Project

2024

1. Implemented symmetric (AES) and asymmetric (RSA) algorithms to securely encrypt/decrypt image files.
2. Tools Used: Python 3, AES, RSA, PIL (Pillow Library).

ACHIEVEMENTS

1. Global Rank 2546-TCS CodeVita Season 13 (Round 2 Qualified out of thousands of global programmers).
2. Microsoft Certified: Azure Fundamentals (AZ-900) - Identity, governance, and cloud compliance.
3. Splunk Ignite Certified - Enterprise SIEM Log Analysis & Threat Data Domination.
4. Quantum Fundamentals - Qubitech; foundational training exploring next-gen cryptographic principles.

SKILLS AND INTERESTS

Programming Languages: Python 3, SQL

SOC / SIEM Operations: Log Analysis, Real-Time Alert Triage, Incident Classification, Alert Correlation

Security Tools: Splunk, Wireshark, Nmap, Kali Linux, Git/GitHub, Docker, Burp Suite

Cloud/Databases: Microsoft Azure, AWS IAM, PostgreSQL, Supabase

Relevant Coursework: Network Security, Operating Systems, DBMS, Cloud Computing, Threat Management, Cryptography

Soft Skills: Problem-Solving, Team Collaboration, Technical Reporting, Adaptability, Incident Documentation

POSITIONS OF RESPONSIBILITY

1. TCS CodeVita Competitor - Represented college division in algorithmic and system troubleshooting challenges.
2. SOC Lab Volunteer - Actively setting up virtualized environments to practice network security scanning.
3. Technical Peer Mentor - Assisting classmates with Python full-stack script logic and configurations.
